

GIS Technician
Job #360

Daniel B. Stephens & Associates, Inc. (DBS&A), a progressive environmental science and engineering consulting firm. DBS&A is seeking a Geographic Information Systems (GIS) Technician to join our team. Primary duties include map creation and editing, development and maintenance of GIS databases, coverages, and linkages to various databases. Position may involve creation of custom utilities in Visual Basic. Experience with MS Access is mandatory. Experience in civil engineering drafting, cartography, illustration, animation, database management, web development, or environmental experience is a plus. A minimum of an Associate's degree, or equivalent course work at a technical or vocational school, in GIS is strongly preferred. Some evening and weekend work is necessary due to fluctuating work loads.

DBS&A offers challenging employment, opportunities for professional development, and a competitive compensation and benefits package. For consideration, please e-mail resume (MSWord format) and cover letter referencing Job #360 to hr@dbstephens.com or mail to Human Resources, DBS&A, 6020 Academy Road N.E., Albuquerque, NM 87109.
